PROFESSIONAL SUMMARY AI-Forward Integration & Software Developer specializing in Python test automation, CI/CD pipelines, and agentic developer tooling. Proven track record translating business requirements into high-fidelity test suites. Utilizes Model Context Protocol (MCP) and custom context management to engineer end-to-end autonomous workflows, bridging the SDLC from Jira to deployment to accelerate global engineering velocity.

TECHNICAL SKILLS

- **Technical Skills:** Python, Java, JavaScript, SQL, MongoDB, AWS (Lambda/S3), Docker, CI/CD, git, pytest, React
- **AI & Automation:** Model Context Protocol, Custom Context Management, Prompt Engineering, SDLC Automation
- **Languages:** English (Native), Mandarin (Proficient), Cantonese (Proficient).

PROFESSIONAL EXPERIENCE

Morgan Stanley

Integration Developer II

Montreal, QC

July 2024 - Present

AI Innovation & Tooling

- Architected a Python-based AI workflow orchestrator utilizing dynamic agent-to-agent hand-offs to autonomously route prompt requests, evaluate internal tools, generate requirements, and manage deployment tasks.
- Integrated custom scripts with AI agents and skills to automate template analysis and execute intelligent diffs, enforcing configuration accuracy across Montreal, New York, and EMEA/APAC offices.
- Leveraged Model Context Protocol (MCP) to extract Jira context and trigger an autonomous workflow that generates code modifications, executes commits, creates PRs, and manages the internal deployment workflow.

Core Infrastructure & Engineering Leadership

- Spearheaded the development of an open-source style Python testing framework, establishing a weekly global steering committee to onboard projects, unblock devs, evaluate proposals, and standardize regression testing.
- Contributed to testing repo sandbox infrastructure, spinning up mock services, isolated ports, and independent QA configurations to prevent multi-user testing interference to provide a more deterministic test result.
- Developed high-fidelity automated test suites to validate business requirements for critical trade risk applications, collaborating with cross-team developers as an early adopter to diagnose upgrade defects prior to deployment.

355 Code

Computer Science Instructor / Product Marketing Analyst

Bethesda, MD (Remote)

August 2023 - Present

- Translate complex programming concepts into accessible lessons for students, refining my ability to communicate technical ideas to non-technical stakeholders.
- Directed business expansion by recruiting/managing teams to scale operations across two regional markets.
- Executed growth-driven marketing strategy, orchestrating campaigns and content to drive student engagement.

Amazon

Software Development Engineer Intern

Seattle, WA

May 2022 - August 2022

- Developed web app to rank music providers, using Alexa Music API latency data to analyze provider selection.
- Engineered React/Java full-stack solutions to visualize optimized data, utilizing AWS Lambda backend processing.
- Presented to the department, curating data to drive business partners toward measurable service improvements.

PROJECTS

NYU Self-Drive | Python, OpenAI Gym, Simulation

- Engineered an OpenAI Gym self-driving simulation, facilitating the transition to remote virtual competitions.

Personal Website & Media Production

- Developed a responsive portfolio featuring custom digital art and experiments with React/AI workflows.
- Launched and produced a YouTube channel, mastering cinematography, color science, and editing to document social projects – honing a high-fidelity approach to storytelling and technical detail.

EDUCATION

New York University, Tandon School of Engineering | Brooklyn, NY | BS in Computer Science | Sept 2019 – May 2023

LEADERSHIP EXPERIENCE

NYU Hong Kong Student Association | President

March 2021 – May 2023

- Led a 30-member board with a \$15k annual budget, directing cultural engagement for 200+ attendees.

NYU Institute of Electrical and Electronics Engineers (IEEE) | Vice President

March 2021 – May 2023

- Organized large-scale events for 100+ members, fostering technical skill development and industry networking.
